

5 Essentials for Every Huddle Room

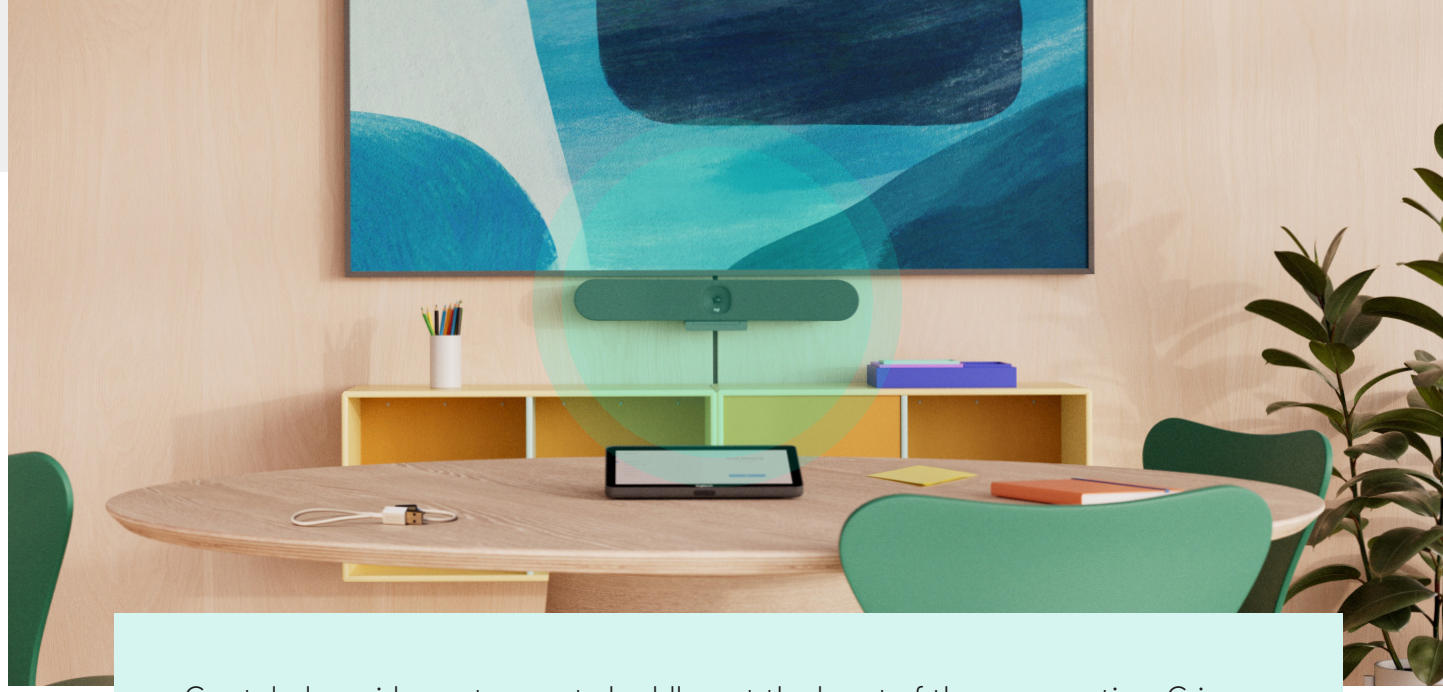

Any small space on campus can become a “huddle room,” a place for collaborators to put their heads together.

83% of higher ed institutions are either transforming their spaces to enable remote learning or exploring how to do it.¹

Start with these five essentials.

Audio & Video

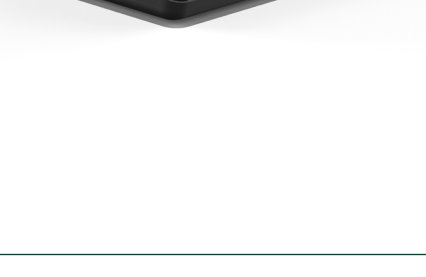

Crystal-clear video puts remote huddlers at the heart of the conversation. Crisp audio, enhanced with AI technologies like Logitech RightSound to eliminate feedback and echo, lets everyone in a huddle follow the group’s train of thought.

LOGITECH RALLY BAR HUDDLE VIDEO CONFERENCING SYSTEM

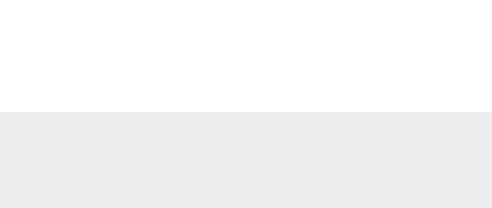

- Brilliant optics and built-in video intelligence to frame participants automatically
- Advanced sound pickup and AI video features ensure a clear and natural experience for remote participants
- Included Multi Mount allows Huddle to work on a wall, on a table, or above a display
- Plug-and-play with most leading video conferencing platforms

LOGITECH TAP IP TOUCH CONTROLLER

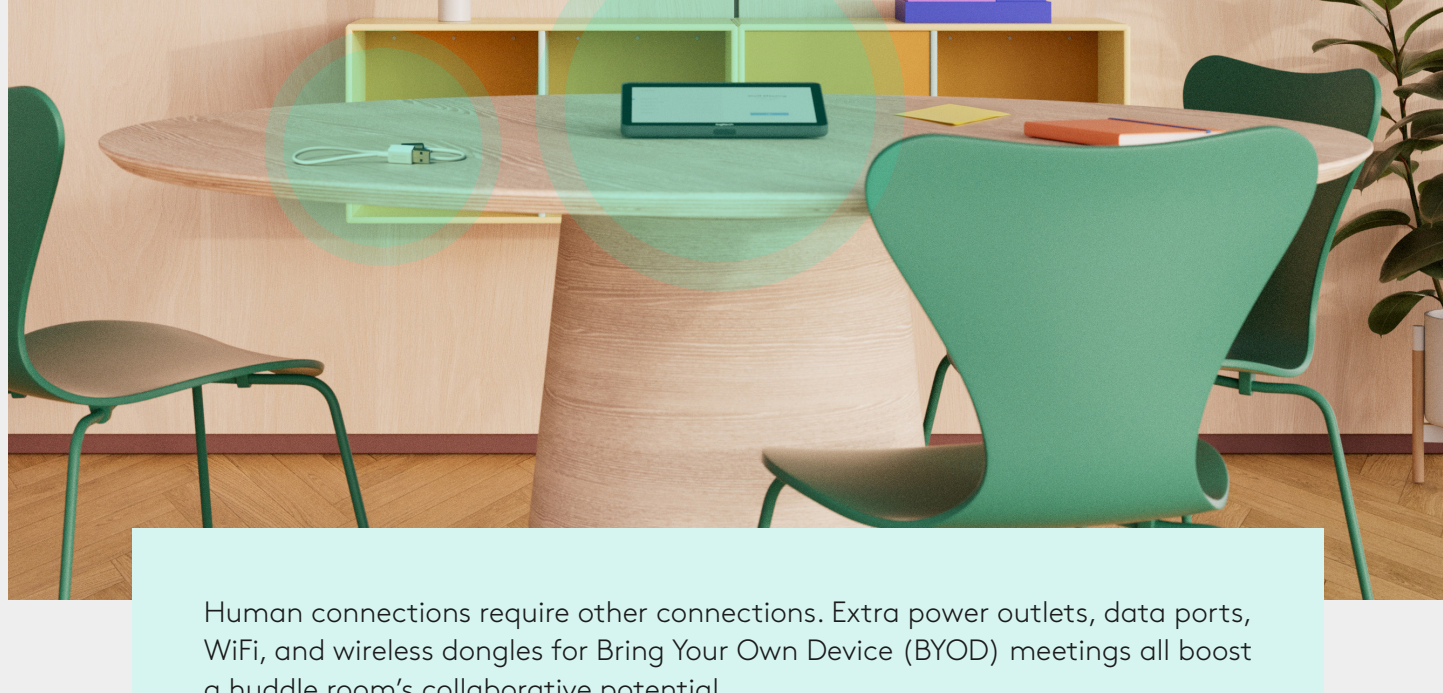

- Optimizes video conferencing solutions like Rally Bar Huddle
- Delivers one-touch meeting join, easy content sharing, and a seamless experience across rooms
- Spacious display, sleek profile, and motion sensor for always-on readiness
- Single cable design and multiple mounting options cut down on IT workload
- Works for rooms of all shapes and sizes

LOGITECH MEETUP 2 CONFERENCING CAMERA

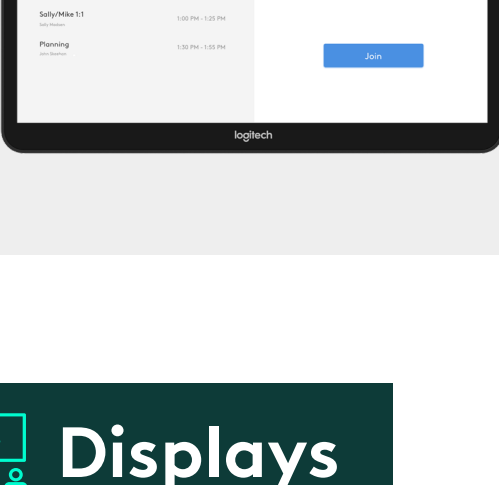

- Advanced lens technology for remarkable image quality
- 120° field of view shows participants even if they’re close to the camera or at the edge of the room
- RightSense AI technologies automatically help everyone see and hear clearly
- All-in-one design takes up less space and minimizes clutter

Connections

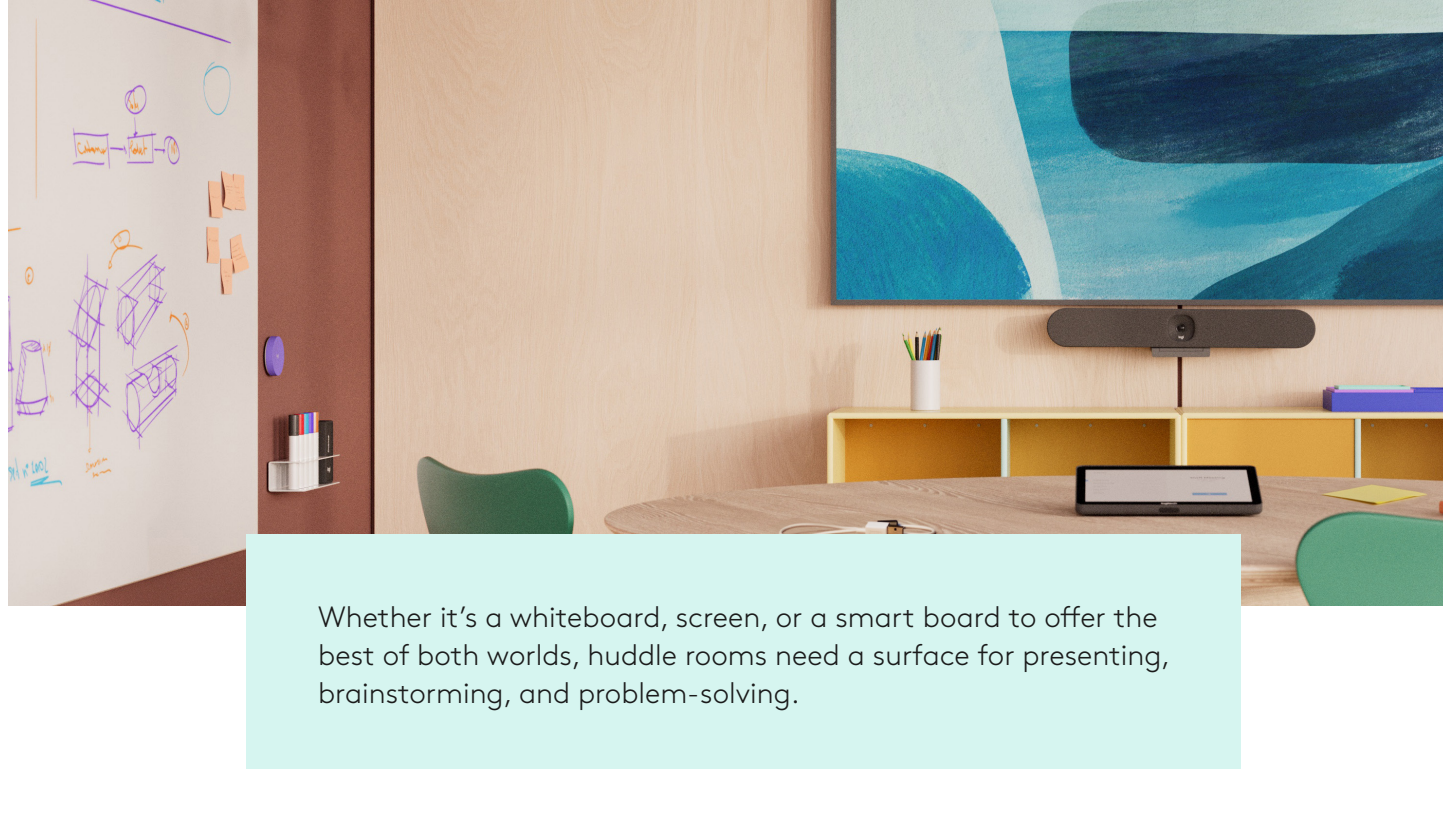

Human connections require other connections. Extra power outlets, data ports, WiFi, and wireless dongles for Bring Your Own Device (BYOD) meetings all boost a huddle room’s collaborative potential.

LOGITECH TAP TOUCH CONTROLLER

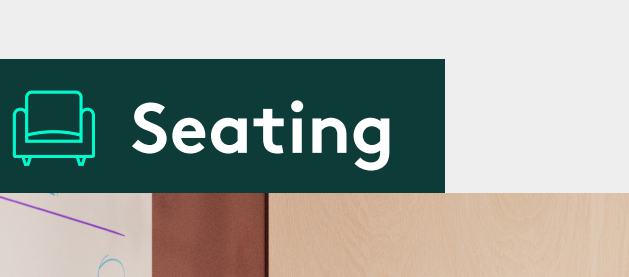

- Join meetings with one touch to make collaboration effortless
- Syncs with calendars to keep everyone on schedule
- Sleek, unobtrusive profile fits any room
- Simple and secure cabling cuts down on IT workload

Displays

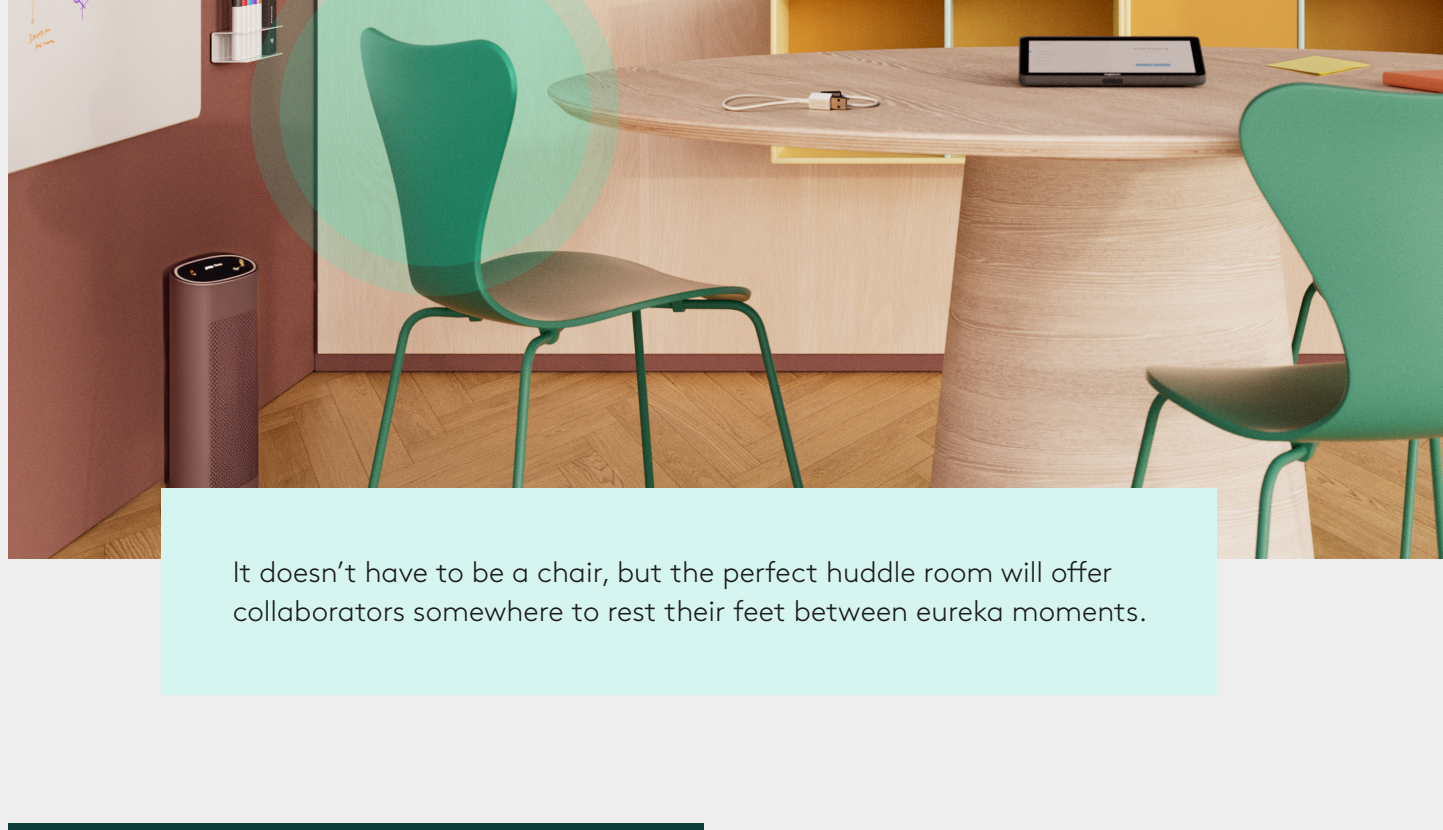

Whether it’s a whiteboard, screen, or a smart board to offer the best of both worlds, huddle rooms need a surface for presenting, brainstorming, and problem-solving.

LOGITECH SCRIBE WHITEBOARD CAMERA

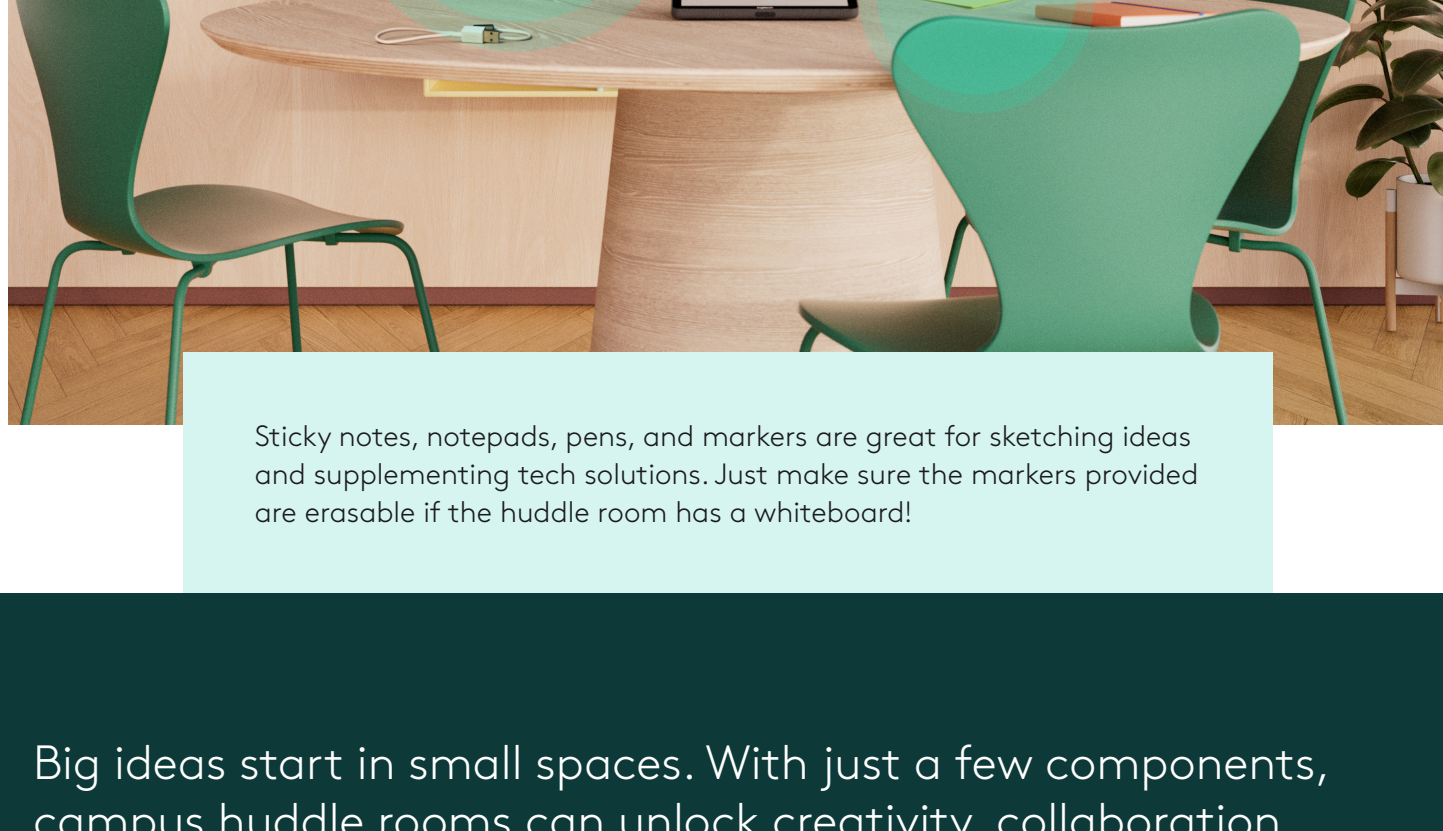

- Share whiteboard content in video meetings at the touch of a button
- AI-powered transparency effect lets remote huddlers see content even while someone’s writing — and Scribe can detect sticky notes, too
- Integrates with leading video conferencing platforms
- Clean, flexible installation

Seating

It doesn’t have to be a chair, but the perfect huddle room will offer collaborators somewhere to rest their feet between eureka moments.

Writing Tools

Sticky notes, notepads, pens, and markers are great for sketching ideas and supplementing tech solutions. Just make sure the markers provided are erasable if the huddle room has a whiteboard!

Big ideas start in small spaces. With just a few components, campus huddle rooms can unlock creativity, collaboration, and new frontiers of learning.
