Transform rooms for greater impact

Customized solutions that convert rooms into immersive learning environments

Augment rooms with state-of-the-art accessories to create immersive ecosystems designed to improve instructional effectiveness, optimize device management, and provide a seamless learning experience for all.
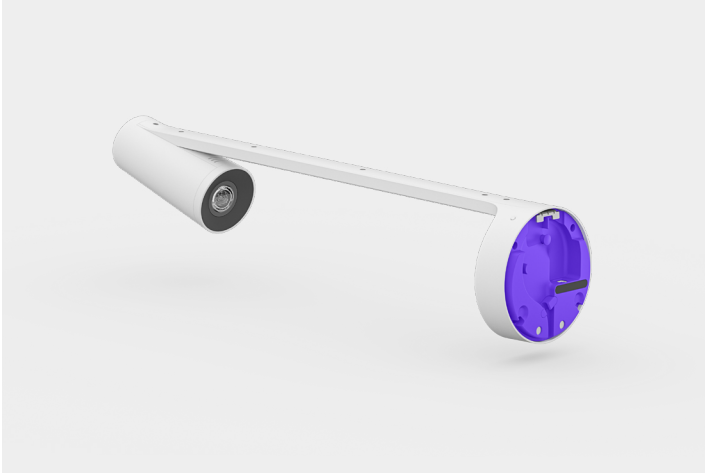

CAMERAS FOR EASY COLLABORATION

RALLY BAR

With AI video intelligence and advanced sound pickup, our class of Rally Bar solutions brings key concepts front and center. Flexible deployments, easy installations and integration with leading video conferencing platforms, the Rally family enables easy collaboration no matter the room size or setup.

ACCESSORIES THAT PUT PRESENTERS IN CONTROL

SCRIBE

Effortlessly share whiteboard content into hybrid setups with outstanding clarity. With built-in AI and a custom lens, Scribe delivers a transparency effect, allowing virtual participants to see "through" the presenter for an unobstructed view.

REACH

An adjustable content camera that lets presenters move the camera to non-digital content to give every participant a front row seat. Easy, one-hand flexibility allows presenters to move in a full 360° rotation to express their point of view.

SPOTLIGHT

Specifically designed to keep audiences engaged, Spotlight illuminates every point to help students and attendees follow what you're saying, whether in-person, virtual or hybrid. With three advanced pointing modes and compatibility with popular presentation platforms, Spotlight puts faculty in full control.

K400 KEYBOARD

K400 is a wireless plug-and-play keyboard with an integrated touchpad for total control of your TV-connected PC. With a built-in touchpad and customized controls, K400 makes navigation between lectures, videos and course content an ease.
